

5 DEPARTMENTS THAT CAN BENEFIT FROM **ISSUETRAK**

Any new software purchase needs to provide ROI across the entire organization – not just a single department.

That's why we've worked hard to make Issuetrak the **Swiss Army knife** of workflow management software, so it can seamlessly fit into every department:

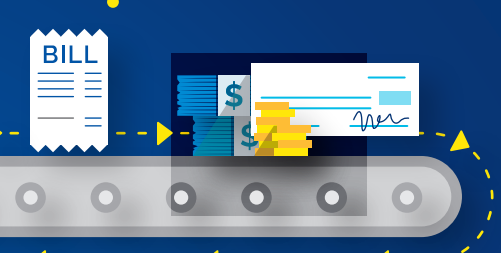

HR

Streamline the employee onboarding process through more tightly integrated workflows, and provide more oversight into employee complaints and compliance demands.

ACCOUNTING

Create repeatable processes and checklists for both payables and receivables so all workflows are completed accurately and on time.

FACILITIES

Keep tabs on and establish priorities for all facilities requests, from workspace setup to scheduling preventative maintenance – all in one user-friendly portal.

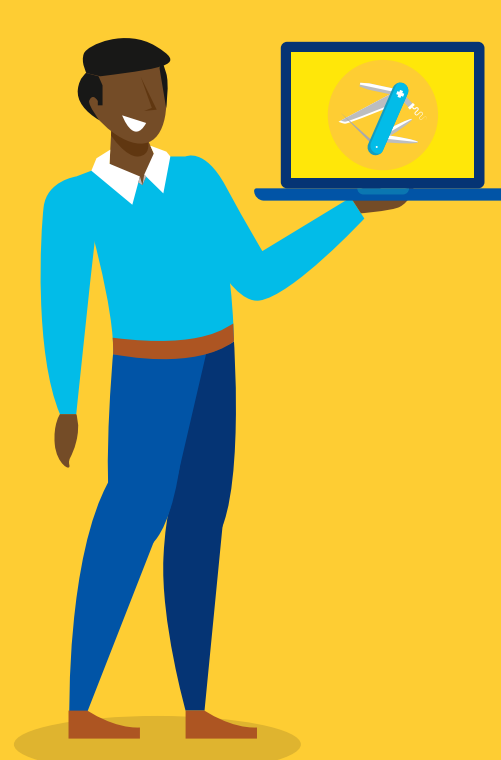

IT

Help desk ticketing becomes a model of efficiency by enabling **best-in-class tracking capabilities**. Requests can be quickly assigned to the appropriate users, and notification settings will flag any unresolved ticket.

LEGAL

Compliance officers can easily produce **the audit trails and transaction records** needed to satisfy even the most stringent government and industry regulations.

No matter which department adopts Issuetrak first, before too long, every department head will be eager to deploy our comprehensive solution.

Say goodbye to painstaking manual processes, internal bottlenecks and costly inefficiencies. Contact us today to find out what Issuetrak can do for your organization.
